Regional Dementia Care Services Programs

North Dakota has a single statute dealing with Alzheimer’s disease and dementia care training. The statute requires the Department of Human Services to contract with a private provider for a dementia care services program in each region of the state. The contractor provides referral, assessment, consultation and training, including providing information to medical professionals, law enforcement, and the public regarding dementia, and providing training to care providers.

Medicaid Waiver

Individuals in assisted living facilities may be eligible for services funded by Medicaid waiver services. However, Medicaid-eligible individuals have limited access to assisted living because funds are not available for the room and board portion of the assisted living costs.
