Alzheimer’s is a family disease that affects people both at home and at work.

The Effect of Alzheimer’s and Dementia Caregiving on the Workplace

- 16% take a leave of absence
- 9% give up work entirely
- 57% have to go in late, leave early or take time off
- 18% reduce their work from full-time to part-time or cut back on hours

The caregiving burden is only going to increase as the number of Americans living with Alzheimer’s disease rapidly grows.

Alzheimer’s disease is the leading cause of death in the United States

More than 16 million Americans provide unpaid care for people with Alzheimer’s or other dementias

Every 65 seconds someone in the United States develops the disease
